

## Demonstrate the TTL / Life of a Packet

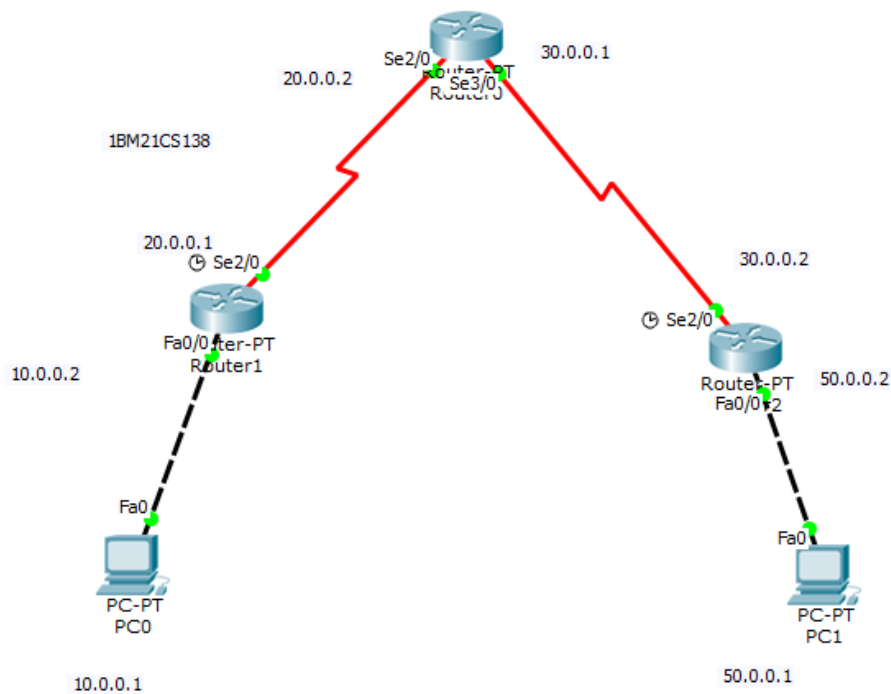

Demonstrate the TTL / Life of a Packet

→ Procedure:

- 1) Create a topology as shown above
- 2) Configure IP address of PCs as 10.0.0.1 and 50.0.0.1
- 3) Configure IP address of routers
- 4) Configure the routers using default / Static routing
- 5) In simulation mode, send a simple PDU from one PC to other
- 6) Use capture button to capture every transfer
- 7) Click on PDU during every transfer to see the inbound & out PDU details

## Topology:

## Output:

PDU Information at Device: Router2

OSI Model [Inbound PDU Details](#) [Outbound PDU Details](#)

PDU Formats
